NSW Rural Water Metering

Client Installation Enquiry Form

Please complete this form and return by email to info@eastcoastirrigationanddrainage.com.au.
It helps us determine the correct NSW non-urban metering requirements under the current rules and recommend the right service for you.

1. Your Contact Details

Contact name

Business name (if applicable)

Phone

Email

Property address / Locality

Postcode

Preferred contact method

2. Location & Water Source

This helps us apply the correct inland vs coastal deadlines and rules.

☐ Inland NSW ☐ Coastal NSW ☐ Not sure

Water sharing plan area (if known)

Main water source (tick all that apply)

☐ River ☐ Creek ☐ Groundwater ☐ Dam ☐ Multiple / Other

Other / details (optional)

3. Licence & Entitlement Details

Total entitlement = combined volume of all licences linked to your work approval.

WAL number(s)

Work Approval number(s)

Total entitlement (ML)

Licensed take only? (Yes / No / Also basic rights)

If unsure of exact ML, tick closest range:

☐ ≤ 15 ML ☐ > 15 and < 100 ML ☐ 100 ML or more ☐ Not sure

4. Works on the Property

List every pump and bore that takes (or can take) licensed water. Diameter is critical for size exemptions.

Surface water pumps

#	Diameter (mm)	Existing meter?	Notes
1			
2			
3			

Groundwater bores

#	Diameter (mm)	Existing meter?	Notes
1			
2			
3			

☐ Any surface pumps ≥ 500 mm?

☐ Any inactive / decommissioned / basic rights only?

5. Current Situation & What You Need

☐ No meter currently installed

☐ Existing meter (note brand/model below)

☐ Full compliant install (AS4747 + DQP + LID/telemetry)

☐ Pattern-approved meter only (smaller volume)

☐ Need advice / site assessment first

☐ Faulty meter / replacement

☐ Telemetry / LID only

☐ Other – describe in notes

Additional notes / questions:

Quick Guide – What the current NSW non-urban metering rules usually require

- Surface pumps ≥ 500 mm → Full AS4747 meter + DQP validation + LID & telemetry (already required statewide)
- Total entitlement ≥ 100 ML → Same full requirements (Inland: now | Coastal: by 1 December 2026)
- Total entitlement > 15 ML and < 100 ML → Pattern-approved meter + mandatory reporting (by 1 Dec 2027 or approval renewal)
- ≤ 15 ML (and pumps/bores under size limits) → No meter required unless trading water allocations

Size exemptions (single works): surface pump < 100 mm or bore < 200 mm are usually exempt. Multiple works have lower diameter limits.

Please email completed form to **info@eastcoastirrigationanddrainage.com.au**

If you have photos of the works, existing meters, or approval documents, please attach them to your reply email.

Thank you – once we receive this form we will review your details and recommend the most appropriate service and next steps.
